Infradapt Marks Five Years of Steady Growth with Managed Tech, Virtualization, Cloud Computing

LEHIGH VALLEY, PA (July 18, 2011) – Founded in 2006, Infradapt, a managed technology firm, has experienced continued growth in advanced infrastructures, IP communications and cloud computing as service solutions, according to Managing Partner Corey McFadden. The adaptation of virtualization for small to medium-sized businesses is accelerating growth in new markets for Infradapt and the tech industry as a whole, says McFadden, 31, who with Partners Antonio Haddad, 44, and John Reilly, 41, founded the firm.

Infradapt is positioned to grow and continue to serve customers with evolving technology needs with both on-site technology services as well as cloud platform and managed services offerings.

“We at Infradapt believe that the technology services industry is rapidly changing from one where the majority of companies have their own servers and network equipment towards one where the majority of servers and applications will be delivered from cloud platform providers,” states McFadden.

The firm, marking its fifth anniversary, employs some 15 staff members and serves more than 200 clients in diverse industries including healthcare, manufacturing, banking, financial services, answering services, aerospace, retail, primary and higher education as well as non-profits.

During its first several years, Infradapt operated from a small office in the basement of an insurance building. The firm has since grown, having purchased a building in the Breinigsville PA area to serve as its headquarters and operations center. Additionally, it has an office in Philadelphia, as well as data center locations in Newark, NJ., Bethlehem, PA, San Antonio, TX, and Los Angeles, CA.

Primary offerings include cloud computing platforms and advanced Infrastructure as service solutions (IaaS), managed technology services for small and mid-sized businesses and communications solutions ranging from basic phone systems to large-scale contact center platforms. VoIP (voice over Internet protocol) and 24/7 help desk are integral to the firm’s success.

Some notable customers of Infradapt include Harriet Carter Gifts, Chapel Steel, WLVT PBS39, Lockheed Martin, Hofstra University, Porsche North America, MobileXUSA, Harrisburg Housing Authority, USA Mobility, and The University of Pennsylvania. Infradapt's engineering team is consistently recognized by its peers, industry magazines and industry conferences as among the best in its field, adds McFadden.

"We're gratified to have had virtually no client attrition since our inception and value strongly our customer, employee, partner and vendor relationships," sums McFadden of the five year business milestone for Infradapt.

About Infradapt

Infradapt is a leading regional technology solutions firm, providing comprehensive IT consulting and outsourcing. Its customers span many industries from small-to-mid sized businesses to multi-location Fortune-1000 enterprises. Infradapt's solutions range from basic IT services through multi-tier outsourced support and business continuity solutions. Infradapt has a strong IP Telephony (VoIP) service concentration, specializing in designing, integrating, and supporting converged voice networks including multi-site and call center systems. Recognized nationally for service and engineering excellence, Infradapt is the company experts choose.
